

### Plus water Tank 1,100 L

Our new line of Plus water tanks has revolutionized manufacturing by allowing the incorporation of up to 40% recycled material, as well as achieving water consumption savings of up to 90%. Furthermore, 100% of product rejection is reintegrated into production.

### Conventional water tank 1,100 L

Our product that revolutionized the market for water storage continues to be present in homes, thus our production process has allowed for a reduction of up to 5% in fuel consumption and an increase of up to 17% in recycled material.

### Biodigester

System for the sanitation of houses without network drainage service. The system receives domestic wastewater and performs primary water treatment, promoting environmental care and preventing contamination of groundwater. It promotes sustainable development by avoiding the emission of greenhouse gases (biodigesters reduce methane emissions into the atmosphere, a gas that is up to 25 times more potent as a greenhouse gas than carbon dioxide).

It improves soil productivity due to the use of bio-suspension, increasing porosity and water retention capacity. It is a cost-effective way to maintain large land areas, rationalizing resources.

It reduces pollution of surface water, groundwater, and other resources. It also eliminates odors and pathogenic agents.

Up to 35% of recycled material has been incorporated, avoiding the consumption of virgin polyethylene.

### **Electric shower**

It has an energy efficiency of over 95% and allows for the substitution of fossil fuels with low electrical consumption. Additionally, it activates automatically even with low pressure, providing immediate hot water, thus preventing water wastage during waiting time.

### **bebbia**

Our business, which offers a practical and efficient solution to ensure pure, reliable, and high-quality water in homes, businesses, and offices, has managed to avoid an average of 11 thousand tCO<sub>2</sub>e by preventing the manufacturing and distribution of 20L water jugs. Additionally, it has prevented the consumption of 662 million 600ml bottles
